

PRESS RELEASE

Issued: 11 September 2018

FOR IMMEDIATE RELEASE

Edge Testing Solutions secures four major client wins

UK-wide expansion continues with these new contracts

One of the UK's fastest growing and largest independent software testing companies, [Edge Testing Solutions](#), part of Eurofins Digital Testing, has announced its success in winning four major new contracts with companies across the UK.

The contracts cover a variety of software testing services for leading organisations valued at over £17.5 million. The major new contracts include The Student Loans Company and a new client in the gas and electricity sector has outsourced a detailed Test Process Review over several energy management systems to Edge Testing.

Further client wins include a power generation equipment supplier, which Edge Testing initially worked with on a project basis before being selected to provide a specialist testing team to work across various projects and technologies. The final contract win is with a consumer credit reporting agency, with Edge Testing supporting a global review of QA for its decision analytics products.

All testing services for the new clients will be undertaken both onsite and remotely from Edge Testing's Glasgow and Birmingham Digital Test Hubs. Edge Testing launched its first Digital Test Hub in Scotland in 2013, with the second opening last year in the Midlands. The company's road map includes a new Digital Test Hub based in the North of England to offer clients UK-wide an easily accessible remote testing service for their in-house applications and back office systems.

Opening a third Digital Test Hub signals Edge Testing's continued growth and expansion across the UK, and the four new client wins are among a number of new developments that have taken place in 2018, including the appointment of Sharon Hamilton as Managing Director.

Sharon commented: "Edge Testing is going from strength to strength, and these new contracts are testament to the strong technical skills and sector experience our growing team delivers.

Adding these four new contracts to our portfolio means our forecast for 2018 is on target. To support further growth, we will be growing our DevOps practice, and promoting our Edge Academy offering."

The Edge Academy offers a strategic alternative to contract resource by assisting organisations in building their own testing resource base cost effectively.

Edge Testing recently appointed Kelly White as Service Delivery Manager for Cheshire, Manchester and Lancashire, alongside Julian Lawless as Service Delivery Manager for Yorkshire.

Company information

Edge Testing, part of Eurofins Digital Testing, is a leading expert in providing world-class software testing solutions. The award-winning company is typically engaged when organisations are implementing a new system or making significant changes to an existing system. We ensure systems are fast, secure, available and work as expected in an increasingly complex and distributed digital age.

We test back office systems, e-commerce sites and apps. We test accessing these from multiple devices including desktops, laptops, tablets, touchscreens and smartphones from our purpose-built device lab.

Founded in 2007, Edge has grown to over 250 people and boasts some of the UK's premier testing thought leaders and experts. Our own Edge Academy has brought over 60 newcomers into the industry in the past two years.

In 2018 Edge Testing became part of Eurofins Digital Testing, the world's leading testing and Quality Assurance (QA) specialists, who operate globally with test lab facilities in the UK, USA, Belgium, Poland, Sweden and Hong Kong.

As part of Eurofins Digital Testing Edge Testing can extend the range of products and services offered to include:

- Extensive testing Services: custom, conformance and compliance
- Testing tools: custom and off-the-shelf
- Staffing and resourcing: lab and field based
- Industry-recognised training courses and training facilities (in addition to the Edge Academy)
- Comprehensive cyber security services and support

Eurofins Digital Testing works with key high-technology businesses in the consumer electronics, software development, automotive, IoT, connected health and media markets.
